

Scanner Software

JSConfig Overview

JSConfig is a program supplied by JoeScan that finds scan heads on a local network.

Use JSConfig to:

- assign IP addresses, Cable Ids, and network address modes (IP Setup modes)
- establish a link between serial numbers and IP addresses
- verify firmware (Build) numbers

JSDiag Manual

Manual for the diagnostics and calibration software for the JS-20 and JS-25 scanner family.

JSDiag will run on any operating system with Java >1.6[®] installed, including Microsoft[®] Windows[®], Mac OS X[®], Linux, and others.
